

HEAVY DUTY CABLE TRACK

Order Code: J94892
Model Number: CABLE TRACK 1000

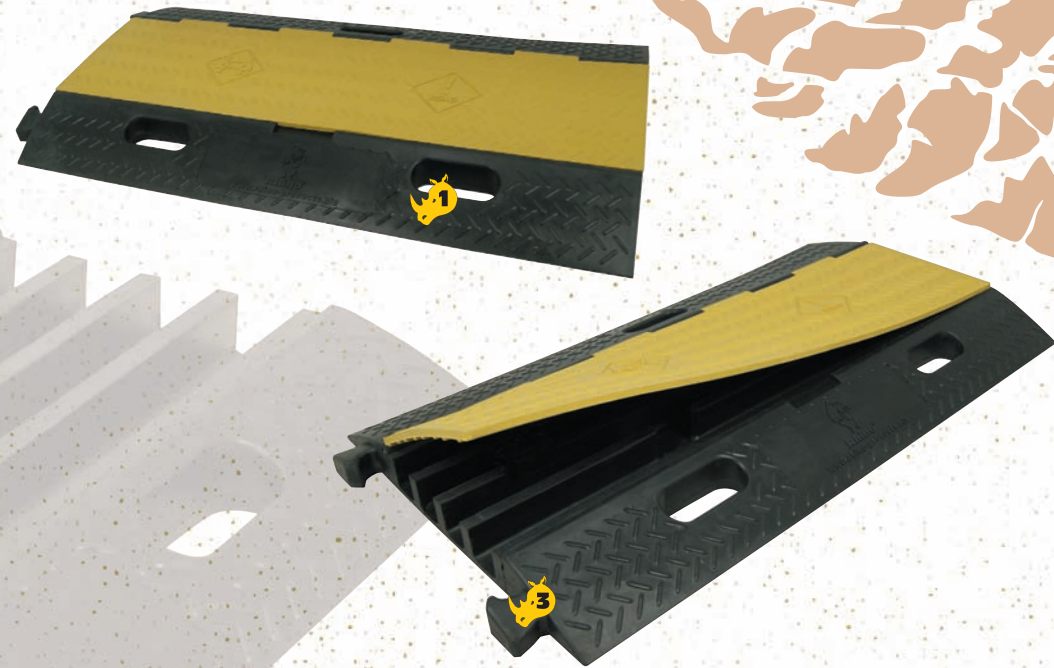

GRAB ME
3 grab handles make installation and transport easier

EASY ACCESS
Lift up lid to reveal 4 channels for quick cable maintenance

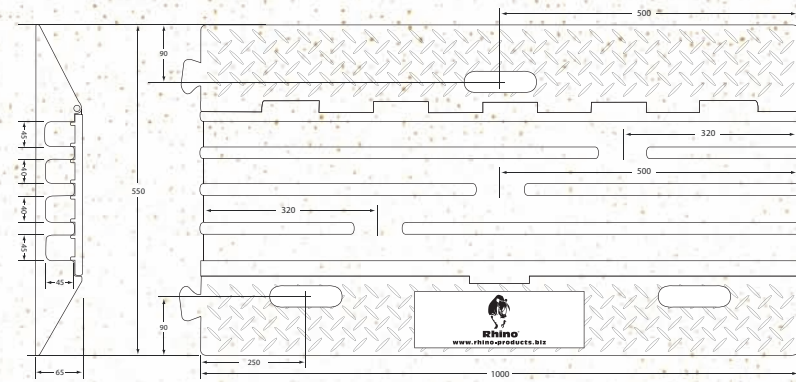

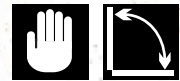

MODULAR DESIGN
Male and Female connectors for making continual lengths

FLIGHT CASES

Constructed of high density rubber the Rhino cable track protects your cables, cords or wires from foot or road traffic. It can support loads of up to 10,000kg so is ideal for indoor or outdoor use. A rubber piano style hinge opens the lid to a 90° angle to reveal 4 separate channels to allow you to make quick and easy maintenance or cable changes and then sits flush with the base to prevent trip hazards. This modular design with male and female connectors means you can make continual custom lengths.

Width (mm)	Length (mm)	Depth (mm)	Weight (kg)
550	1000	65	25.0
